TLM Technologies completes rollout of evoPOS to entire MFG estate

TLM are delighted to announce the completion of the rollout of evoPOS to MFG's entire estate.

Starting in October 2019, the first phase of the project converted 473 sites to evoPOS, followed by phase 2 – the install of evoPOS to MFG's existing Iridium2 (legacy Oracle system) estate – a further 445 sites.

In addition, all sites were linked to our evoHeadOffice solution – allowing MFG to control product ranging, pricing and promotions across their estate.

Working with our partners, Oxhoo, Celestra, PLM Global and MDT, the project was completed in May and saw.

- 918 sites upgraded
- 1604 evoPOS installed
- 918 back offices installed

The average store closure time was just over 2 hours.

Bob Laidlaw, Operations Director at TLM Technologies said: *“We learnt many lessons on the journey, not least how to cope with 2 national lockdowns, critical stock being delayed by congestion at Felixstowe container port, new import restrictions as a result of Brexit, a global shortage of semiconductors and to top it all – the equipment earmarked for the final tranche of sites being marooned on the Ever Given in the Suez Canal! We are therefore extremely proud that we still delivered this project ahead of time and exceeded customer expectations.”*

Going forward, as a trusted supplier to MFG, we have begun to install the pilot phase of our evoBackOffice solution to MFG sites – this will enable them to aggregate data from all their back-office systems.

Paresh Patel, IT director at MFG said: *“We are delighted with the evoPOS rollout across our entire estate. It's reliable with a modern user interface that needs minimal training on. It has all the functions and features we need to deliver great customer service and, at the same time, it allows us to easily control product ranging, pricing and promotions across our entire estate.”*

Editor's Note:

Founded in 2010 in Bedford, England, TLM Technologies, a company of MADIC Group, provides a complete solution for fuel and convenience (c-store) retailers globally: Offering a full suite of applications ([evolution](#)) to optimise the operation of both forecourt and c-store.

TLM's world-class technology and support includes EPOS, back-office, head office and forecourt equipment supply and service. Almost half of independent convenience and fuel retailers in the UK use TLM's products or services.

[MFG](#) is the largest independent forecourt operator in the UK with over 900 convenience and fuel stations.

[Oxhoo](#) are our TLM's exclusive POS hardware supplier – providing the Onix 200, Zeo and EVOQ POS terminals as well as peripherals.
