

Dashboard Weather Widget

evoBackOffice dashboard has a weather interface that displays a snapshot of the next 5 days local forecast, handy when producing stock orders, planning staffing and other business events. To set this up stores first need to register with the MET Office website and activate the free API usage app.

1 Go to the Met Office website - <https://metoffice.apiconnect.ibmcloud.com/metoffice/production/>

2 Register to create a new account.

- Enter email address
- Send verification code
- Enter verification code from email and select **Verify Code**
- Enter name and password details
