

# Retail Price Changes

Retail Price Change enables quick and easy price changes to be made to any group of products; e.g. departments, sub-departments, tag groups, supplier, or products selected on the HHT by the store.

Changes can be made to align item retail prices to a specified margin, or change prices by a specified % or value.

**This guide shows how to do a fixed price increase on a specific sub-department e.g. a budget increase of 50p on cigarette prices.**

## From the home screen select Stock -> Retail Price Change

- 1**
- Select **Add Retail Price Change** 
  - Type in a **Reference** (e.g. Tobacco Budget)
  - Select **Create Retail Price Change**

- 2**
- Select **Bulk Add Items** 
  - Select the sub-department(s) as many as required from the drop down list.

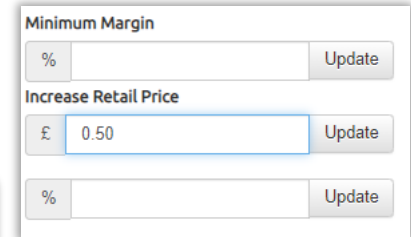

- Select **Bulk Add Items** 

The screen will now populate with all items in the selected sub-department

Retail Price Change Lines							
Barcode	Description	PLU Code	Cost Price	Retail Price	New Retail	New Margin	PM
5000143920727	SOVEREIGN BLUE K/S TPD 20'S	101016	£7.55	£10.64	10.64	14.83%	<input type="checkbox"/> 
5000143927931	SOVEREIGN BLUE K/S TPD 20'S	101016	£7.55	£10.64	10.64	14.83%	<input type="checkbox"/> 
5000143922516	STERLING S/KINGS TPD 20'S	101025	£8.17	£11.42	11.42	14.20%	<input type="checkbox"/> 

- 3**
- Key in the amount of increase to be added to items (this example is 50p)
  - Select **Update**

NOTE: Price reductions can be made if required using a negative value.

The screen will now show the increased price in the New Retail box. Prices can be manually changed if required. When all new retail prices are correct select

 and 

Remember to complete Shelf Edge labels for price increases before sending prices to the POS
