

evoConnect

evoConnect enables you to connect securely to all your evoBackOffice stores from any online device anywhere. Giving access to reporting, stock data and evoBackOffice functionality.

Once you have your log in details go to the evoConnect portal here <https://evoconnect-portal.evolutiontlm.co.uk/login>

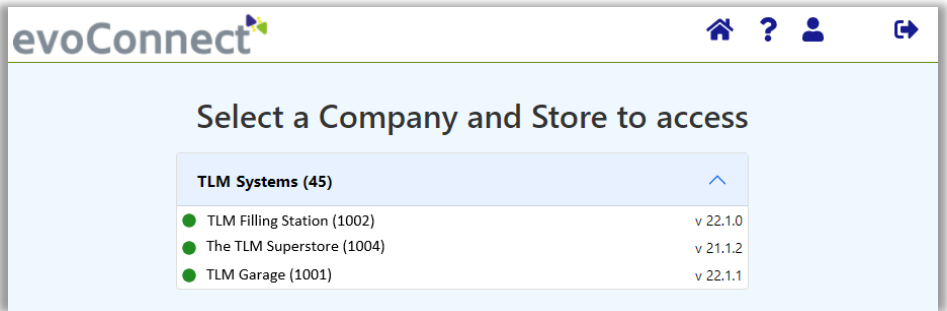

1

At the log in. Enter your email and password which will have been sent to you from TLM.

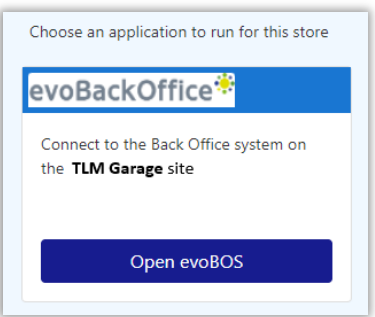

2

When logged in, the screen will display all of the connected stores

- Select the store to connect to from the list

3

The screen will confirm the store name. Select **Open evoBOS** [No need to log in as it uses the login associated with your account.]

Remember when using evoConnect you will not have access to the store HHT for any stock movements, and whilst being able to process any supplier orders, updates and EDNs, the collecting or sending of these files to suppliers must be done from the store PC.

If you do not currently have evoConnect, any store using evoBackOffice can have evoConnect added to their evo subscription. Contact our sales team at salesupport@tlmgroup.co.uk
